

An Internship Report
Of
GEN AI VIRTUAL INTERNSHIP

Submitted To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By

Roll Number of Student: 2410030943
Name of Student: ATUL RAJ MAURYA
Batch: 2024-2028

CANDIDATE'S DECLARATION

I, ATUL RAJ MAURYA, do hereby declare that the internship report titled “Gen AI Virtual Internship” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature:-

Student Name: ATUL RAJ MAURYA

Roll No.: 2410030943

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their valuable guidance, constructive criticism, and friendly advice during this work. I am sincerely grateful to them for sharing their knowledge, valuable suggestions, and insightful views on various aspects related to this internship.

I would like to thank the AICTE–EduSkills Virtual Internship Program team, EduSkills Academy, and AWS Academy for providing me with the opportunity and a structured platform to learn and gain practical exposure in the domain of Generative Artificial Intelligence (Gen AI). I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support, encouragement, and guidance throughout the internship.

I express my heartfelt gratitude to my parents for their constant support, encouragement, and blessings.

Signature:-

Student Name: ATUL RAJ MAURYA

Roll No.: 2410030943

Certificate of Virtual Internship

This is to certify that

Atul Raj Maurya

IILM University, Greater Noida

has successfully completed the 8-weeks

Gen AI Virtual Internship

During April - June 2026

May this Internship learning propel you toward a bright and successful career.

Curriculum Provided by:

Internship Offer Letter

Student Name : Atul Maurya
Stream : B.Tech
Branch : B.Tech(Computer Engineering)
Institute Name : IILM University, Greater Noida
Internship Domain : AWS Gen AI
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU69d4fe47e6a861775566407

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 8-week Gen AI Virtual Internship undertaken under the AICTE–EduSkills Virtual Internship Program during the period from April 2026 to June 2026. The internship was undertaken as part of the Bachelor of Technology programme in Computer Engineering at IILM University, Greater Noida. The primary focus of the internship was to develop an understanding of Generative Artificial Intelligence (Gen AI) and gain practical exposure to industry-relevant concepts, technologies, and applications associated with the field of Artificial Intelligence. The internship followed a structured learning approach consisting of weekly learning activities, assessments, assignments, project documentation, and a final assessment. The programme was designed to provide students with conceptual understanding along with practical exposure to emerging technologies in the field of Generative AI. Throughout the internship, the learning activities helped in developing technical knowledge, problem-solving abilities, and an understanding of how AI-based technologies can be applied to practical problems. Upon successfully completing the required internship activities and assessments, an AICTE–EduSkills Virtual Internship Certificate was awarded. The internship certificate confirms the successful completion of the 8-week Gen AI Virtual Internship.

4.2 Organization Profile

EduSkills Academy is an organization working under the theme “Nation Building Through Skills” with the objective of providing industry-oriented skill development opportunities to students and professionals. EduSkills collaborates with the All India Council for Technical Education (AICTE) to conduct the AICTE–EduSkills Virtual Internship Program, providing students with structured learning and practical exposure in various emerging technology domains. The programme is designed to bridge the gap between academic learning and industry requirements by providing students with opportunities to develop technical skills through organized learning modules, practical activities, assessments, assignments, and project-based learning. The Gen AI Virtual Internship was conducted through this structured virtual learning environment, with **AWS Academy** mentioned as the curriculum provider on the internship completion certificate. The programme provided an opportunity to explore the fundamentals and

applications of Generative Artificial Intelligence while developing industry-relevant technical and problem-solving skills. Through its virtual internship programmes, EduSkills aims to support students in developing professional capabilities and preparing themselves for future opportunities in the technology sector.

4.3 Problem Statement

Generative Artificial Intelligence is rapidly becoming an important area of computer science and is being used in a wide range of applications including content generation, automation, natural language processing, intelligent assistance, software development, and other AI-based solutions. Although students may study Artificial Intelligence and Machine Learning concepts as part of their academic curriculum, they may have limited opportunities to gain structured practical exposure to emerging Generative AI technologies and their applications. The problem addressed through this internship was therefore to develop a structured understanding of Generative Artificial Intelligence and gain practical exposure to the concepts, workflows, and applications associated with this emerging technology. The internship provided a systematic learning environment through which the concepts of Gen AI could be explored through learning activities, assignments, assessments, and practical exercises. This approach helped in connecting theoretical knowledge with practical learning and provided a foundation for understanding how Generative AI can be used to address real-world problems and develop intelligent technology-based solutions.

4.4 Project Objectives

The major objectives of the Gen AI Virtual Internship were:

- To develop a fundamental understanding of **Generative Artificial Intelligence (Gen AI)**.
- To gain practical exposure to the concepts and applications of **Generative AI**.
- To understand the basic principles associated with Generative AI and its real-world applications.
- To develop **technical knowledge, analytical thinking, and problem-solving abilities** through structured learning activities and practical exercises.

- To gain familiarity with **industry-relevant AI technologies** and understand their potential applications in different domains.
- To gain practical experience in completing **technical assignments and project documentation**.
- To participate in **regular assessments** and evaluate the progress made during the internship.
- To improve confidence in working with **emerging Artificial Intelligence technologies**.
- To build a strong foundation for further learning in the field of **Generative AI and Artificial Intelligence**.
- To successfully complete all required **weekly activities, assignments, assessments, project documentation, and final assessment** of the virtual internship.

4.5 Scope of the Project

The scope of this internship covers the conceptual and practical learning of Generative Artificial Intelligence through a structured virtual internship programme. The internship focused on understanding the fundamentals of Gen AI, exploring its applications, and gaining practical exposure to AI-based workflows and technologies. The scope included structured learning activities, practical exercises, assignments, project documentation, weekly assessments, and a final assessment. The internship provided an opportunity to understand how Generative AI can be applied to different types of real-world problems and how emerging AI technologies can be incorporated into modern technological solutions. The programme also supported the development of technical knowledge, analytical thinking, problem-solving skills, and documentation abilities. Since the internship was conducted in a virtual learning environment through the AICTE–EduSkills programme, its primary purpose was skill development, conceptual learning, practical exposure, and assessment rather than deployment of a production-level system in a live organizational environment. The knowledge and skills

acquired during the internship can provide a foundation for further academic projects, research, and future professional work in Artificial Intelligence and Generative AI.

4.6 Technologies and Tools Used

The internship primarily focused on Generative Artificial Intelligence (Gen AI) and related AI concepts. The major technologies and tools/resources used during the internship include:

- Generative Artificial Intelligence (Gen AI) – Main domain of the internship.
- Artificial Intelligence (AI) – Fundamental concepts related to intelligent systems and applications.
- Machine Learning (ML) – Basic concepts supporting the understanding of AI applications.
- AWS Academy – Curriculum provider mentioned on the internship completion certificate.
- AICTE–EduSkills Virtual Internship Platform – Structured platform used for the internship learning programme.
- Digital Learning Resources – Online resources provided for structured learning and practical activities.
- Assignments and Project Documentation – Used to apply and document the concepts learned during the internship.
- Assessment Resources – Used for evaluating learning progress throughout the internship.
- Final Assessment – Conducted as part of the successful completion requirements of the internship.

4.7 System Architecture

The overall architecture of the internship can be represented as a structured learning and practical development workflow rather than as a single production software system. The process begins with the Learning Layer, where concepts and learning resources related to Generative Artificial Intelligence are studied, followed by the Conceptual Understanding Layer, where the learned concepts are analyzed and understood through structured activities. The next stage is the Practical Learning Layer, where practical

exercises and activities are performed to strengthen the understanding of Gen AI concepts and applications. This is followed by the Assignment and Documentation Layer, where the required assignments and project documentation are completed as part of the internship requirements. The Assessment Layer evaluates the learning progress through weekly assessments and other required activities. The final stage is the Final Assessment Layer, where the overall knowledge and performance developed during the internship are evaluated. After successful completion of the required activities and assessments, the process reaches the Certification Layer, resulting in the award of the AICTE–EduSkills Virtual Internship Certificate. Thus, the overall workflow can be summarized as Learning Resources → Conceptual Understanding → Practical Activities → Assignments → Assessments → Project Documentation → Final Assessment → Internship Completion and Certification

4.8 Methodology

The internship followed a structured methodology designed to combine conceptual learning, practical exposure, assignments, and continuous assessment throughout the 8-week programme. The methodology began with the introduction and study of Generative Artificial Intelligence concepts through the learning resources provided as part of the internship programme. The learning process then progressed towards understanding the practical applications and workflows associated with Gen AI. Practical activities and exercises were performed to reinforce the concepts learned and to provide exposure to the application of AI technologies. Assignments and project documentation were completed as required by the internship programme, allowing the learning outcomes to be documented in a structured manner. Regular assessments were conducted during the internship to evaluate understanding and monitor progress. The final stage involved completing the required final assessment, which evaluated the overall learning and performance achieved throughout the programme. After fulfilling the required activities, assignments, assessments, and other internship requirements, the internship was successfully completed and the Virtual Internship Certificate was awarded.

4.9 Expected Outcomes

The successful completion of the Gen AI Virtual Internship is expected to provide a fundamental understanding of Generative Artificial Intelligence and its practical

applications. The internship is expected to improve knowledge of AI concepts and provide exposure to modern AI-based technologies and workflows. It also aims to develop practical problem-solving abilities and improve the ability to understand how Generative AI can be applied to real-world challenges. The completion of assignments and project documentation is expected to improve technical writing, documentation, and project presentation skills. The structured assessments and practical activities are also expected to improve confidence in learning and working with emerging Artificial Intelligence technologies. The internship further provides a foundation for pursuing advanced learning, academic projects, research, and professional opportunities in the fields of Artificial Intelligence, Machine Learning, and Generative AI. Successful completion of the required activities and final assessment ultimately results in the award of the AICTE–EduSkills Virtual Internship Certificate, confirming the completion of the 8-week Gen AI Virtual Internship.

4.10 Certificates of Completion and Communication Proof

The required internship-related documents are attached to this report as supporting evidence of the successful completion of the internship. The **Internship Offer Letter** issued by EduSkills confirms the student's selection for the 8-week AICTE–EduSkills Virtual Internship Program in the **Gen AI** domain and specifies the internship duration as **April 2026 to June 2026**. The offer letter also describes the structured nature of the programme, including weekly learning activities, weekly assessments, project documentation and assignments, and a final assessment. The **Certificate of Virtual Internship** issued after successful completion confirms that the internship was successfully completed and recognizes the completion of the 8-week Gen AI Virtual Internship. The certificate also identifies AWS Academy as the curriculum provider. Copies of the Internship Offer Letter and Internship Completion Certificate are attached as documentary proof of the internship, along with other relevant official communication, e-mail correspondence, assessment records, or learning-related evidence, wherever applicable.

**EduSkills Foundation**
Internship Completion Certificate

Dear **Atul Raj Maurya**,

🎉 **Congratulations!**

You have successfully completed **10 weeks AWS Gen AI Internship** with EduSkills Foundation. Your **certificate** is ready — please log in to your profile and **download** it.

 **Steps to Download Your Certificate:**

1. Login at: <https://aictc-internship.eduskillsfoundation.org/>
2. Go to the **Certificate** Section from your sidebar
3. Click **Download Certificate**

Please post your **certificate** on your **LinkedIn profile** to get better job opportunities and visibility from corporates.

 **Why You Should Share Your Achievements on LinkedIn**

- 1. World's Largest Professional Platform**
LinkedIn has 900+ million professionals and 60+ million companies worldwide.
- 2. Recruiters Actively Use LinkedIn**
Around 8 out of 10 recruiters use LinkedIn to find and verify candidates.
- 3. Profiles Are Checked Before Hiring**
More than 90% of hiring managers review LinkedIn profiles before shortlisting candidates.
- 4. Better Visibility for Freshers**
Students who post **certificates, internships, and projects** appear in recruiter searches more often.
