

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

GEN AI

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Supported by AWS Academy

Atul Raj Maurya

Roll No. 2410030943 | B.Tech CSE

April – June 2026

**Atul Raj
Maurya**

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410030943

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE, Batch 2024–2028

Internship Domain

AWS Academy

Duration

8 Weeks | April – June 2026

ABOUT THE PROGRAM

EduSkills, AICTE & AWS Academy

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme “Nation Building Through Skills.” It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the GEN AI Virtual Internship, AWS Academy provides the curriculum and learning resources.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018
certified organization.

AICTE Patronage

Run under the AICTE National Internship
Portal.

Industry-aligned curriculum provided through
AWS Academy

Bridging Theoretical Knowledge and Practical Generative AI

Although students are increasingly introduced to Artificial Intelligence and Machine Learning concepts through academic coursework, they often have limited structured exposure to Generative AI and its practical applications. Understanding concepts theoretically is not sufficient to develop the skills required to work with modern AI technologies and apply them to real-world problems. There is a need for structured learning that combines fundamental concepts with practical activities, assignments, assessments, and hands-on exposure to Generative AI technologies.

This internship addressed that gap — through structured learning and practical exposure:

What the Internship Set Out to Achieve

Understand Generative AI

Develop a fundamental understanding of Generative Artificial Intelligence and its concepts.

Explore AI Applications

Learn about practical applications and use cases of Generative AI.

Gain Practical Exposure

Apply learned concepts through structured practical activities and exercises.

Develop Technical Skills

Build technical knowledge and problem-solving abilities related to emerging AI technologies.

Complete Assignments

Work on required assignments and project documentation as part of the internship.

Evaluate & Improve

Complete weekly assessments and the final assessment to evaluate overall learning and progress.

The Toolkit Behind the Internship

Generative AI

Core AI technology
and concepts

Artificial Intelligence

Fundamentals of
intelligent systems

Machine Learning

Foundational machine-
learning concepts

AI Applications

Practical applications
of Generative AI

AI-Based Workflows

Understanding
practical AI workflows

Practical Exercises

Hands-on learning
and activities

AWS Academy

Curriculum and
learning resources

Assessment & Projects

Assignments, documentation
and assessments

From Learning to Real-World Gen AI Application

The 8-Week Learning Journey

1 WEEK

Introduction to Generative AI

Explored the fundamentals, key concepts, and real-world applications of Generative AI.

2 WEEK

Understanding Gen AI Models

Studied different types of generative models and how they work.

3 WEEK

Prompt Engineering Basics

Learned effective prompt-design techniques and best practices.

4 WEEK

Exploring Gen AI Tools

Hands-on exploration of popular Generative AI tools and platforms.

5 WEEK

Practical Applications

Applied Gen AI concepts to solve real-world problems through guided activities.

6 WEEK

Assignments & Project Work

Completed assignments and worked on the project documentation.

7 WEEK

Assessment & Evaluation

Cleared weekly assessments and reviewed learning progress.

8 WEEK

Final Assessment & Completion

Completed the final assessment and successfully concluded the internship.

EXPECTED OUTCOMES

Skills & Capabilities Gained

- ✓ Developed a fundamental understanding of Generative Artificial Intelligence and its concepts.
- ✓ Gained practical exposure to Generative AI through structured learning activities and exercises.
- ✓ Developed an understanding of the applications and potential use cases of Generative AI.
- ✓ Improved technical knowledge, analytical thinking, and problem-solving abilities related to AI.
- ✓ Gained experience in completing technical assignments and maintaining project documentation.
- ✓ Completed the required learning activities, assessments, assignments, and final assessment of the internship.

CERTIFICATION

Successfully Completed

Grade

O – Outstanding

Certificate ID

4d19a7ccf749d1580737

Student ID

STU69d4fe47e6a861775566407

Duration

8 Weeks | April – June 2026
